

As an American, I wish to continue to pay for a service that keeps myself and my family informed at home and on the road. XM Satellite Radio should not be limited in any way, shape or form. If the service is provided and people want to pay for that service, there is no clear reason why it should be limited. It is their right to provide it, and it is our right to listen to it.

I am respectfully requesting that the FCC reject the National Association of Broadcasters attempt to censor what I can hear on my XM satellite radio.
